

## **A Successful “Echo Insight” Event with Groundbreaking Gaming Technology Unveils**

Hong Kong/Macau, 26 November 2024 – Paradise Entertainment Limited (“Paradise Entertainment” or the “Company”, HKEx stock code: 1180) is pleased to announce the successful conclusion of the “Echo Insight” event (“Echo Insight” or the “Event”) hosted by LT Game Limited (“LT Game”), a subsidiary of Paradise Entertainment, on 26 November 2024 at the Galaxy International Convention Center in Macau. This exclusive event gathered valued customers, industry professionals, business analysts and media representatives, etc. to experience the debut of LT Game's latest innovations.

At the Event, the Company showcased a range of cutting-edge gaming technology products, providing visitors with a first-hand experience of revolutionary gaming solutions. Highlights included our new slant-top cabinet, “Speedwave”, tailored for our next generation of live multi game (“LMG”) system, along with a series of groundbreaking electronic table games (“ETG”) including “Mori Dice” and various slot games.

To adapt to the evolving dynamics of the global gaming industry, the Company continues to invest in product design and deliver comprehensive solutions for prestigious casino operators. Our flagship cabinet “Speedwave” is anticipated to receive a warm welcome. This cabinet offers a diverse and seamless gaming experience through its modular design and personalised setups for patrons and casino operators. Integrated with our artificial intelligence systems, this solution provides strategic recommendations during the gameplay for patrons and also enhances management flexibility for casino operators.

As the sole provider of LMG systems and terminals in Macau, the Company leverages its strong industry reputation and leading position and is committed to continually innovative advanced LMG systems to earn the trust of a wide customer base in Macau and beyond. In light of the recent policy adjustments within the Macau gaming industry and the changing customer needs, the launch of our new version of LMG systems presents an appealing option for casino operators, offering improved cost-effectiveness and operational benefits. The Company remains confident in capitalising on the ongoing transformation and solid growth of the gaming industry.

Innovation in game development is essential for success in the gaming sector. The Company plans to introduce a series of groundbreaking games, including the newly revolutionised game “Mori Dice”. This game retains the traditional Sic Bo rules while introducing a unique feature: the three dices are rolled in three separate rounds, allowing players to place bets in each round, thereby enhancing the overall gameplay experience.

Dr. Jay Chun, Co-chairman and Managing Director of Paradise Entertainment, stated, “We are excited to showcase our latest innovations at this year’s Echo Insight event. The return of in-person gatherings provided us with an excellent opportunity to present our advancements, including our new “Speedwave” cabinet, our latest LMG systems and groundbreaking ETG and slot games. These achievements reflect our commitment to pushing the boundaries of technology in the gaming industry. With Macau as our home base, Paradise Entertainment is dedicated to high-tech investment, research, and development as we strive to drive industry innovation globally. We extend our heartfelt gratitude to our customers, collaborators and media partners for their continued support, and we look forward to further partnerships that will redefine the gaming experience.”

#### **About Paradise Entertainment Limited**

Paradise Entertainment Limited (HKEx stock code: 1180, together with its subsidiaries collectively referred to as the “Group”) engages in the development, sale and leasing of electronic gaming equipment and systems, as well as the provision of casino management services in Macau. The Group is the inventor, patent owner and sole provider of live-multi game terminals and dominates the electronic table games market in Macau. The Group has also been developing slot machines. Apart from the casino management business in Macau, the Group envisions to become a global leader in gaming equipment.
